

# FX Main Units Lineup

## FX3U

Controllable I/O: 16 - 256 points  
Max. 384 with CC-Link remote I/O  
(Main Unit I/O: 16/32/48/64/80/128 points)

### Top of the line

The FX3U is the original dual system-bus, high-speed, fully expandable compact PLC designed to seamlessly control communication, networking, analog, and positioning systems. With a maximum of 384 controllable local and networked I/O via CC-Link, the FX3U uses its power and flexibility to provide a solution for a variety of applications.

- 3rd generation compact PLC
- High efficiency with more speed, performance, memory, and new functions
- Built-in high speed processing and positioning
- The FX3U can control a maximum of 256 connected I/O, and up to 384 points with CC-Link remote I/O.

### Product Details

All-in-one CPU, power supply and I/O. Includes many upgraded features from the FX2N, including high expandability using Expansion Boards and Special Adapters to add functionality.

### Fast Instruction Times

Basic Instructions: 0.065 µs / instruction (Contact Instruction)  
Applied Instructions: 0.642 µs / instruction (MOV Instruction)

### Large Memory

64,000 steps of built-in program memory.  
Flash Memory Cassettes with loader function are available.

### Applicable Standards

All products support EN and UL/cUL standards.  
Various shipping approvals are supported as well.

### Large Device Memory

Auxiliary Relays	7,680 points
Timers	512 points
Counters	235 points
Data Registers	8,000 points
Extension Registers	32,768 points
Extension File Registers (with optional Memory Cassette)	32,768 points

## FX PLC EXTENSION EXPLANATION

<b>Expansion Boards</b>	The expansion boards, also called BDs, are a basic CPU function extension. Thanks to the compact dimensions no additional installation space is required. Programming is done directly via special commands and dedicated data register in the PLC. Available are serial communication, analog and digital I/O BDs.
<b>Adapters</b>	The Special Adapters, also called ADPs, add standard high-speed functions to the PLC. Mounted on the left side, these units are extremely compact and easy to use. The programming is similar to the BDs via special instructions and dedicated data registers in the PLC. Available are various serial communication, analog, temperature input, positioning, high-speed counting and data logging ADPs. Compared to the BDs the ADPs offer more flexibility and performance.
<b>Special Function Blocks</b>	The Special Function Blocks, also called SFBs, are the most advanced function extension available for the FX PLC. Thanks to the standardized communication via memory integrated into the SFBs, programming is straightforward. The integrated CPU performs PLC scan time independent operation perfectly fitted for networking or positioning tasks, thus reducing the load on the PLC main unit. Up to 8 different units can be connected to the main unit. Available are analog, serial communication, networking, positioning, high-speed counting and temperature control. Compared to the ADPs, the SFBs offer higher functionality and more flexibility. Dedicated SFBs for the FX3GC and FX3UC are available as well.
<b>I/O Extensions</b>	Digital I/O extensions are available with or without power supply. A wide range from 8 to 48 I/O points with different inputs and outputs are available. There is no limitation on the number of extension units or blocks, you can design the system to match application requirements, just make sure to check the system power supply and number of available I/O points. Dedicated I/O blocks for the FX3GC and FX3UC are available as well.
